Looking great. Modular and re-deployable (road legal size or smaller) makes for some of the best agility in construction: fastest deploy and iteration (improvement) speeds and can be one of the lowest cost methods too depending on how the design, test, and manufacturing is organized (scrum hardware) and material and tool selection (XM).

Boldt, HGA raced the clock to develop modular health care centers for COVID-19 patients - Milwaukee Business Journal

[bizjournals.com](https://www.bizjournals.com)

Building Design and Construction in 3 weeks

By [Sean Ryan](#) – Reporter, Milwaukee Business Journal
Apr 12, 2020, 5:00pm EDT

The call came on March 15, three days into Wisconsin's public health emergency, and the mission was to design and start making modular hospital facilities for people suffering from COVID-19 within three weeks.

Agile Mono-tasking: Manufacturing with just one project is really fast

- GM: Idea to mass assembly in 3 weeks. Goal 30k units by August.
- Ford: logistics on-line delivering essential gear with 3m.

Agile
Coaches can
help these
teams!

3 weeks from idea to tooled mass production (with customer feedback!)

"There is a group of a dozen or so amazing people at [Toyota North America](#) who have been working tirelessly for the past 2-3 weeks to ramp up production of medical face shields to donate as part of Toyota's [#COVID19](#) response effort. The team includes [Tom Wipert](#), [Kirk Barber](#), [Leah Almeling](#), Dallas Martin and quite a few others

The communications team talked to local hospitals to figure out what was most needed, then our TILT Lab team began rapid prototyping using [#3dPrinting](#). With customer feedback from local hospitals they were able to iterate on the design quickly. Next they created a 3D printed [#InjectionMolding](#) die insert to scale up quantities while more durable dies were being machined. Now they're cranking out over 10,000 per day and have shipped 112,000 to date! They're also ramping up other Toyota facilities to produce more and working on plans for making other critical supplies too." -Mike Tromans, Manager, Toyota USA

Ventilators: idea to V2 in 18 days

Tesla April 5, sprint demo of rev 2 functioning.
 Second rev April 4.
 April 3 doctors receiving ventilators
 Mar 31 nyc hospitals received ventilators.
 Mar 27 committed to give away ventilators.
 Mar 26 started delivering bough ventilators.
 Mar 25 ventilator in house design began.
 Mar 23 California gov confirms ventilators delivered.
 Mar 22 50,000 masks delivered to Washington state doctors, and PAPR helmets.
 Mar 21 discussion with Medtronic on state of the art.
 Mar 20 space x and Tesla working on ventilators.
 Mar 19 called hospitals to confirm what they need
 Mar 18 evaluated what Tesla and spaceX could build.

You can watch the V2 demo here: <https://www.youtube.com/watch?v=zZbDg24dfN0>

@JoeJustice0

Unlikely but Wildly Successful Anyway

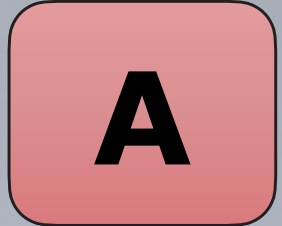

- These projects suffered from a worst case scenario of project management:
 - Changing requirements even late in development
 - No defined processes and tools for the response
 - Lack of clear contracts
 - No agreed plan
- And they still shipped 5200% faster than business as usual with high customer satisfaction. Why?

5200% faster based on a MMC cycle of 3 years, versus 3 weeks idea to delivery

High Customer Satisfaction derived from social media gratitude displays from hospitals and care workers around the world

Solution

Paolo Sammiceli
Agile Coach, Author
Sienna, Italy

- The emerging solution seems to be working in isolated, autonomous small teams
 - Agilists have decades of skill optimizing this
- Remote shift change meetings
 - The Scrum of Scrums and MetaScrum patterns by Jim Coplien seem to be the most effective template to coach here
- Increasing production by reducing handoffs, cross-training, and developing “full stack” hardware teams capable of completing and testing entire product modules in team
 - T shaped people in cross functional teams
 - Modular hardware architecture with known stable interfaces and TDD
- These isolated, autonomous teams then prioritize their own shift activities and conduct their own impediment removal
 - The Product Owner and Scrum Master role help here

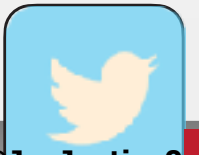

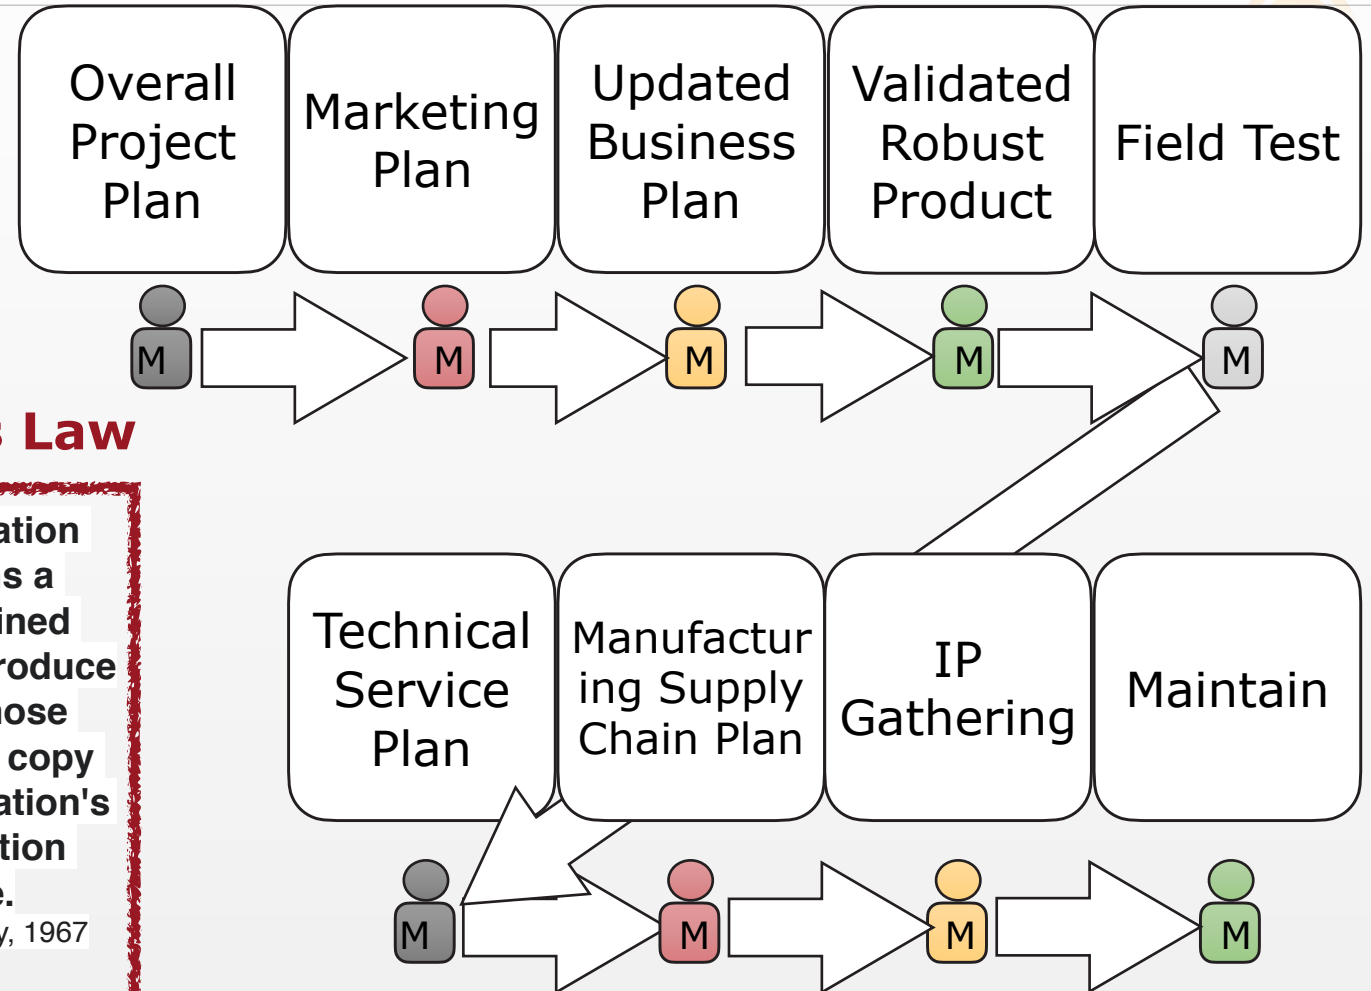

Phase Teams

Conway's Law

Any organization that designs a system (defined broadly) will produce a design whose structure is a copy of the organization's communication structure.

– Volkmar Denner, CEO of Bosch

1. Executive session
2. Executive group consulting
3. Product Sprint 1:

5 sprints

Siemens

- Shorten product development cycles: Lab Equipment
 - Hardware CSM all design staff
 - Hardware CSM and CSPO all procurement and contract staff
 - Leadership workshop all product executives

Toyota

- Culture Change for faster innovation
- Maintain manufacturing skill, employee care, social and environmental responsibility while obtaining silicon valley speed
- All staff CSM training, most staff Hardware CSM training.
- Executive workshop
- Hired Google employee as CEO
- Next Toyota CEO embedded in group, hardware CSM training.

Aerospace Tooling

3D Printing Aerospace Tooling | Drill Templates

Technology to shorten or in-source the supply chain

Drill templates are a common tool used across many industries in manufacturing and are heavily relied on in aerospace tooling. When a drilling operation has to be performed by hand, custom tooling needs to be developed to simplify the process and make it repeatable. A drill template tool makes a cumbersome drilling operation as simple as locating the tool and then drill the hole.

See how 3D printing can be used as a method to fabricate durable aerospace tooling, and when applied to applications such as drill templates can lead to significant cost and time savings. This video provides an overview of the drill template tooling category and then dives into a hands-on example demonstrating design to fabrication to implementation. Throughout the process, the Markforged metal and composite 3D printers are utilized end-to-end to rapidly deploy tooling built to withstand rugged operator use on the shop floor.

NEXT:

If you own a business:

- identify a member of your board of directors to be a process coach for the business
- Then add process coaches to your teams

If you are the member of a team:

- ask your process coach where you can gain efficiencies in your team

And you are a process coach, or a Scrum Master:

- identify the value stream map of your business, and sharpen your skills at every opportunity
