

Thriving in Uncertainty....

1st Principles

Pat Reed

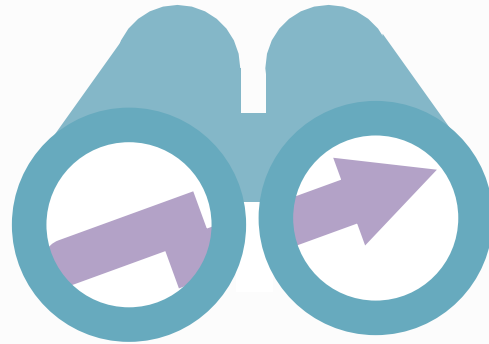

.....we're heading into uncharted territories...

Change itself is changing.....

What's the one thing ?

I'll believe it when I see it . . .

....See things through
a new mindset?

I'll see it when I believe it

Everything that exists right
now

THE ADJACENT POSSIBLE

Imagine...

What if we actually manifest
our reality based on where we
focus our attention and
beliefs?

THE ADJACENT POSSIBLE

We can't think ourselves into a new way of acting—we must act ourselves into a new way of thinking.

Evolving an Agile Mindset is the hardest part so let's start from where we are right.....now)

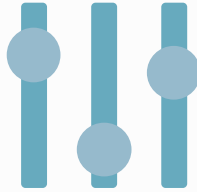

Imagine....

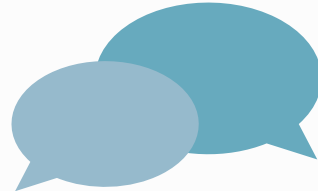

Organizational ability to rapidly...

sense

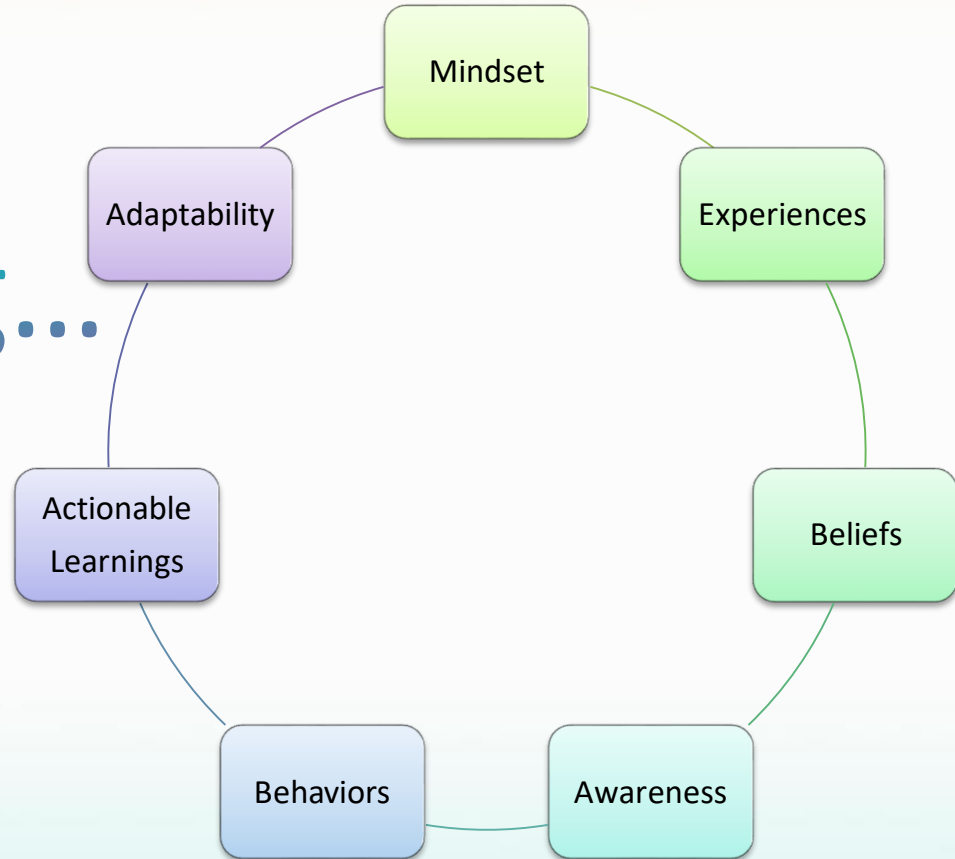

adapt

thrive

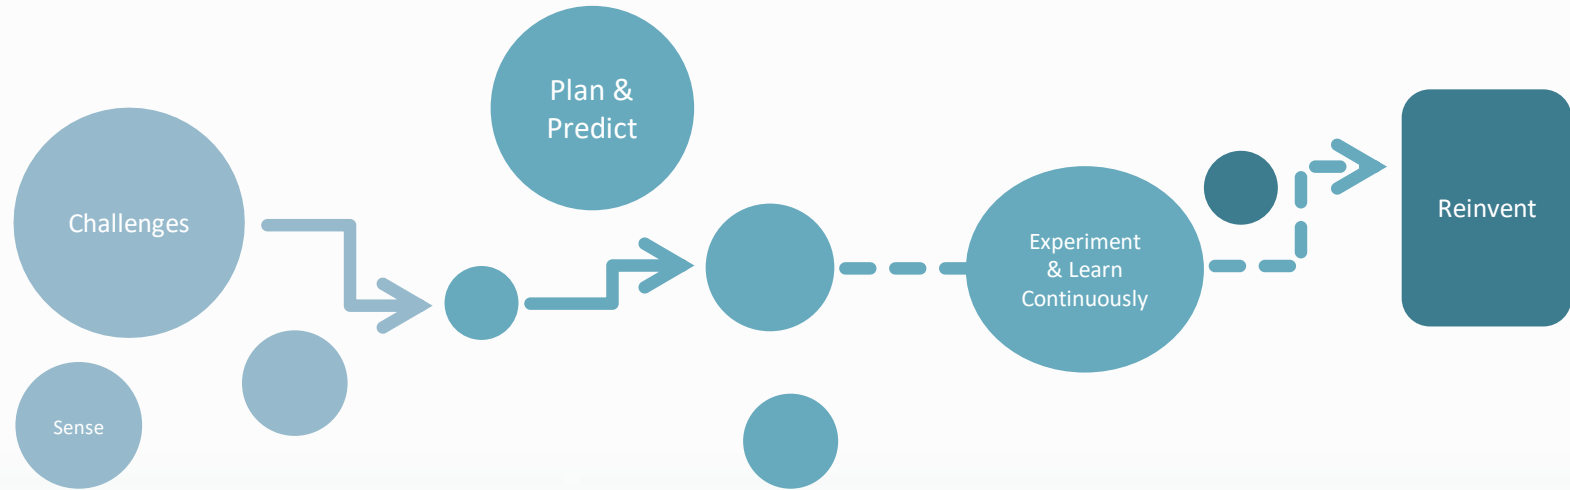

...By Manifesting...

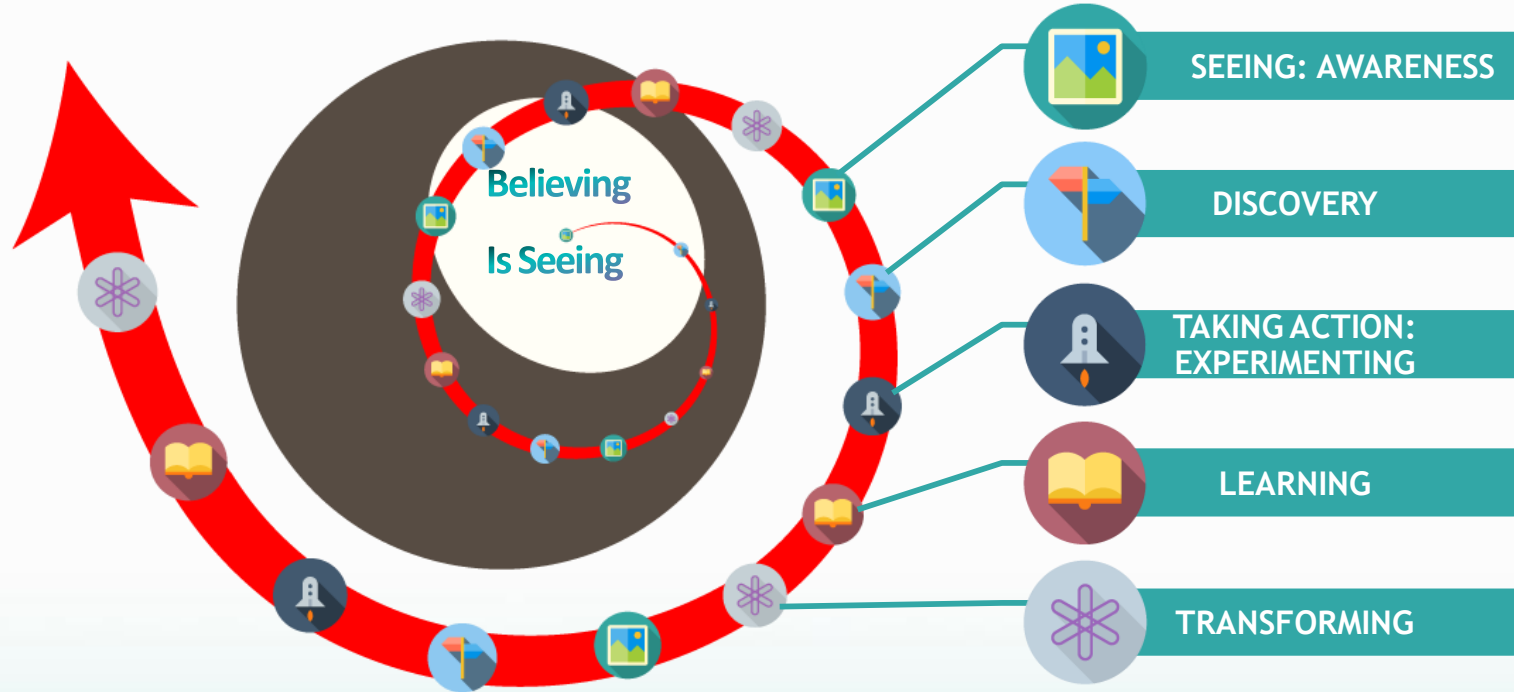

Learn and adapt real time
when confronted with
unforeseen challenges...

fundamentally reshape ourselves realtime...

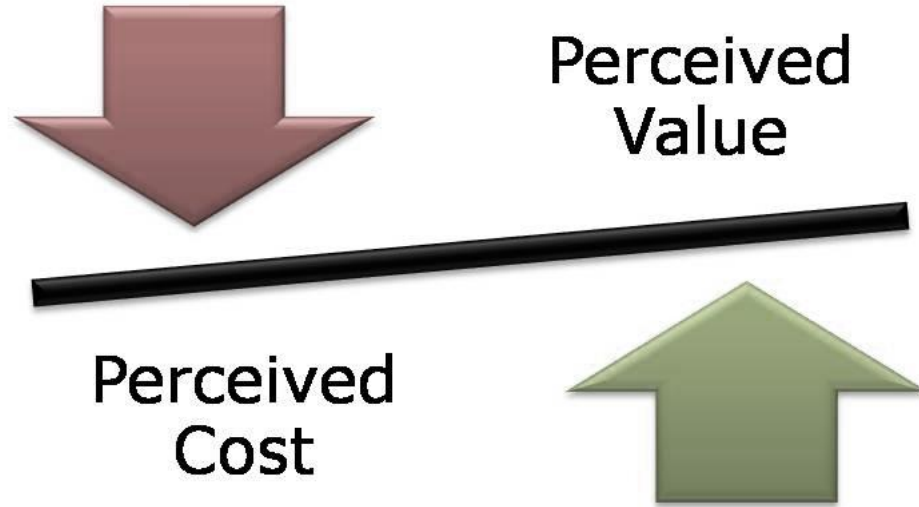

How: An Adaptive Leadership Framework

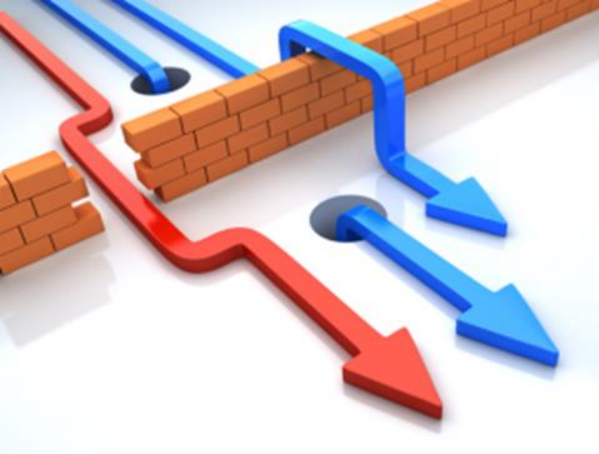

Stop trying to do more
work, faster....and
start generating
more value by doing
less work....faster,
with fewer resources

Value = Measureable Benefit / Cost to Create

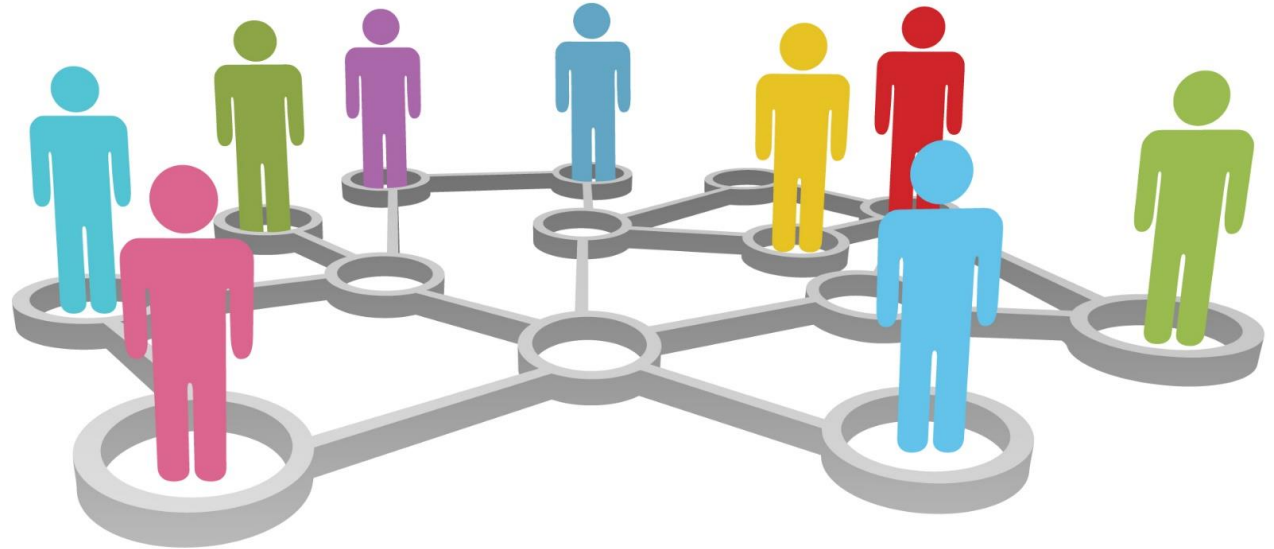

*“We are doomed to failure
without a daily destruction of
our various preconceptions.”*

Taichii Ohno

Our Future is Created by What We Do
Today

What Are the Tough Choices We As Leaders Will Make Today to Shape Our Future?

and empower everyone with safety, autonomy,
mastery and inspiring sense of purpose...

Thank You!
